Intrinsically Safe & Highest Gas Group

Global Standards	Protection Method	Gas Group	Temperature Class	Equipment Protection Level	Ingress Protection Level
Ex	ic	IIC	T5/T4	Gc	/ IP65

The hazard level of gas group increases from IIA to IIC with group IIC being the most severe. Substances like hydrogen can be ignited very easily.

Gas Group IIA

Includes Propane

More energy to ignite gas

Gas Group IIB

Includes Ethylene

Gas Group IIC

Includes Hydrogen

Less energy to ignite gas

Pulsarlube EXP is the first in the market certified for use in gas group IIC environment.
