

Basket strainer filters are inline filters for filtering oils, water, aqueous solutions or aggressive media in chemical and petrochemical plants, heavy industry, energy generation and shipbuilding.

Your product advantages: 16 FKE, 16FKD

- Flow from inside to outside
- 16FKD changeover with ball valve
- Various material variants (steel, steel-plastic coated and stainless steel)
- Drain screw as standard (so that the dirt can be drained off at the bottom of the filter).
